

300 Case Studies: How We Got Here

Total Stats:

- \$1.5 Billion in Validated Measurable Improvements
- 5.4 Million Lives Positively Impacted
- 2.9 Million Care Gaps Closed
- 119k Readmissions Avoided

Enabling Clinical Improvements

In 2013, one of Health Catalyst's first published case studies featured significant clinical improvements, with MultiCare reporting a reduction in sepsis mortality rates by an average of 22% after implementing Health Catalyst's Adaptive Data Warehouse. Read more sepsis case studies here.
